Bulletin of Mathematical Sciences is a peer-reviewed, new Open Access, journal launched by King Abdulaziz University, Saudi Arabia. The object of publishing this journal is to encourage the publication of high-quality survey articles as well as papers containing original research of wider interest. It is expected that such articles will have a strong impact on the development of future mathematics. The expository articles in this issue are authored by distinguished mathematicians including one of the recent Fields Medalists. The papers that are being considered for future issues have the same high standard. Most survey articles are invited by the editors. Interested authors may submit their papers online for consideration of publication in this journal. The peer-reviews are completed in a relatively short time and the paper, if accepted, appears online soon after.
